OBJECTS

To leverage my expertise in PHP and Laravel, along with my 3+ years of experience, to secure a position in a healthy, innovative, and challenging workplace. I aim to continually expand my skills and knowledge by staying up to date with the latest programming techniques. I am eager to continue learning and exploring new technologies Vue.js, React.js, Node.js, MongoDB in order to stay at the forefront of the rapidly evolving web development landscape.

WORK EXPERIENCE

Codecell Limited *(Uttara, Dhaka)*
(July 2022 –Present)

PHP / Laravel Developer

Responsibilities:

1. Developing Web Applications: Designing, coding, and modifying web applications using PHP and Laravel framework.
2. Database Management: Creating and maintaining the database schema, writing optimized queries, and ensuring data integrity.
3. Bug Fixing and Troubleshooting: Identifying and resolving bugs, performance issues, and other technical problems in web applications.
4. Application Architecture: Participating in the design and architecture discussions to ensure scalable and maintainable code.
5. API Development and Integration: Building and integrating RESTful APIs to connect web applications with external services and databases.
6. Front-end Development: Collaborating with front-end developers to integrate server-side logic with the user interface.
7. Code Reviews and Quality Assurance: Conducting code reviews to maintain code quality, ensuring best practices, and performing unit testing.
8. Version Control: Using Git to manage codebase, collaborate with team members, and track changes.
9. Performance Optimization: Analyzing and optimizing application performance, identifying and implementing improvements.
10. Keeping Up with Industry Trends: Staying updated with the latest PHP, Laravel, and web development trends, tools, and best practices.
